PROFESSIONAL SUMMARY

Data Analyst with a strong academic foundation in **Business Analytics & Computer Science**, supported by hands-on experience at **Fortray Global Services LTD**. Skilled in **Python, SQL, Advanced Excel, Power BI** and **Tableau** for **data cleaning, exploratory analysis, dashboard development** and **reporting**. Experienced in working with large datasets, improving data accuracy and delivering insights to cross-functional teams. Backed by industry-focused certifications in **Power BI, SQL, Tableau** and **Data Analytics**.

KEY SKILLS

- **Tools & Technologies:**
Python (Pandas, NumPy), MySQL, SQL, Advanced Excel, Power BI, Tableau (Parameters, Calculated Fields, Dashboards), Machine Learning, SPSS, WEKA, Java, C, C++
- **Processes:**
Data Analysis, Data Cleaning, Data Visualization, Data Extraction, Trend and Pattern Analysis, Statistical Analysis, Data Modelling, Dashboard Creation, Reporting and Data-driven Decision Making
- **Soft Skills:**
Attention to Detail, Data Accuracy and Integrity, Cross-functional Collaboration, Clear Communication, Problem Solving and Adaptability

TRAINING & CERTIFICATIONS

- Microsoft Certified: Fabric Analytics Engineer Associate (DP-600) — Microsoft, Jul 2026
- PCAD™ – Certified Associate Data Analyst with Python (PCAD-31-02) — Python Institute, Jul 2026
- Oracle Database SQL Certified Associate (1Z0-071) — Oracle, Jun 2026
- Microsoft Certified: Azure Data Fundamentals (DP-900) — Microsoft, Jun 2026
- Microsoft Certified: Power BI Data Analyst Associate (PL-300) — Microsoft, Feb 2026
- Data Analyst Master's Program Certificate — Simplilearn, Jan 2026

PROFESSIONAL EXPERIENCE

Junior Data Analyst Intern

Fortray Global Services LTD, London, UK | Sep 2025 – Present

- Collected, cleaned and analyzed datasets exceeding 1 million records using Python (Pandas, NumPy), improving operational efficiency by 20% through data-driven insights.
- Designed and maintained 10+ interactive dashboards using Excel, Power BI and Tableau, increasing visibility of key performance trends by 30%.
- Utilized SQL and Python for data extraction, transformation and predictive modeling with basic machine learning algorithms, reducing reporting time by 40%.
- Collaborated with 5+ cross-functional stakeholders to define data requirements and deliver insights that supported strategic planning and contributed to 15% revenue growth.
- Implemented data validation and integrity checks, achieving 99.9% data accuracy across analytical outputs.
- Presented analytical findings to both technical and non-technical audiences, improving cross-team understanding of insights by 25%.

CAPSTONE PROJECTS

NHS Elective Care Performance & Backlog Recovery Analytics – Healthcare Analytics

Objective: Analyzed NHS elective care waiting-list data to monitor performance, identify backlog pressures and evaluate recovery strategies using data analytics and interactive reporting.

Tools & Technologies: Python, SQL Server, Power BI, Power Query, DAX, Excel/CSV

- Cleaned, validated and consolidated monthly NHS RTT datasets using Python to create a reliable analytical dataset for healthcare performance analysis.

- Designed a SQL Server star schema and reporting views to support efficient analysis of waiting lists, provider performance and specialty-level pressures.
- Developed interactive Power BI dashboards with DAX-driven KPIs and recovery scenario modeling to monitor backlog trends, 18-week performance, and long-wait patients.

Result: Identified significant waiting-list pressures, with 6.65M patients on the waiting list, 64.3% meeting the 18-week target and 95K waiting over 52 weeks. Recovery analysis showed the potential to reduce the backlog to 4.61M patients through targeted improvement strategies.

UK Supermarket Inventory Risk Analytics – Power BI

Objective: Developed an end-to-end data analytics solution to evaluate supermarket inventory performance, supplier delays and stock risk across regions, enabling proactive decision-making and risk mitigation.

Tools & Technologies: Azure Blob Storage, Microsoft Fabric (Data Factory, Lakehouse, SQL Endpoint), PySpark, Power BI, Power Query, DAX, Data Modeling

- Consolidated, cleaned and standardized multi-region supply chain datasets while ensuring data quality through validation, anomaly detection and key metric development.
- Built an end-to-end Azure and Microsoft Fabric data pipeline, processing 2,000 records with PySpark and designing a star schema model for efficient analytics and risk assessment.
- Developed an interactive Power BI dashboard with KPIs, trend analysis and what-if scenario capabilities to support data-driven supply chain decision-making.

Result: Delivered a comprehensive inventory risk analytics solution that improved visibility into supplier performance, stock vulnerabilities and regional risks, enabling data-driven decisions and scenario-based planning for supply chain optimization.

AdventureWorks SQL Data Warehouse & Power BI Sales Analytics

Objective: Designed and implemented an end-to-end sales analytics solution by transforming the AdventureWorks transactional database into a star schema data warehouse in SQL Server and building interactive Power BI dashboards to analyze sales performance from 2011–2014.

Tools & Technologies: SQL Server 2022, SQL Server Management Studio (SSMS), Power BI Desktop, Power Query, DAX, Dimensional Modeling, Star Schema Design, Draw.io

- Designed and developed a star schema data warehouse using fact and dimension tables, along with SQL-based ETL processes for data transformation, loading and validation.
- Built optimized data relationships and created key business metrics such as Total Revenue, Total Orders, Average Order Value and Average Customer Sales.
- Developed a three-page interactive Power BI dashboard to analyze customer, product and territory performance with KPIs, slicers, drill downs and trend visualizations.

Result: Delivered a scalable analytics solution enabling stakeholders to monitor sales performance, identify high-value customers and products and make data-driven decisions based on trends and territory insights.

EDUCATION

MSc Business Analytics | Swansea University, Wales, UK | Sep 2023 – Sep 2024

BTech Computer Science | Institute of Technology & Management, Gurgaon, India | Aug 2008 – May 2012
